

Topographic Survey

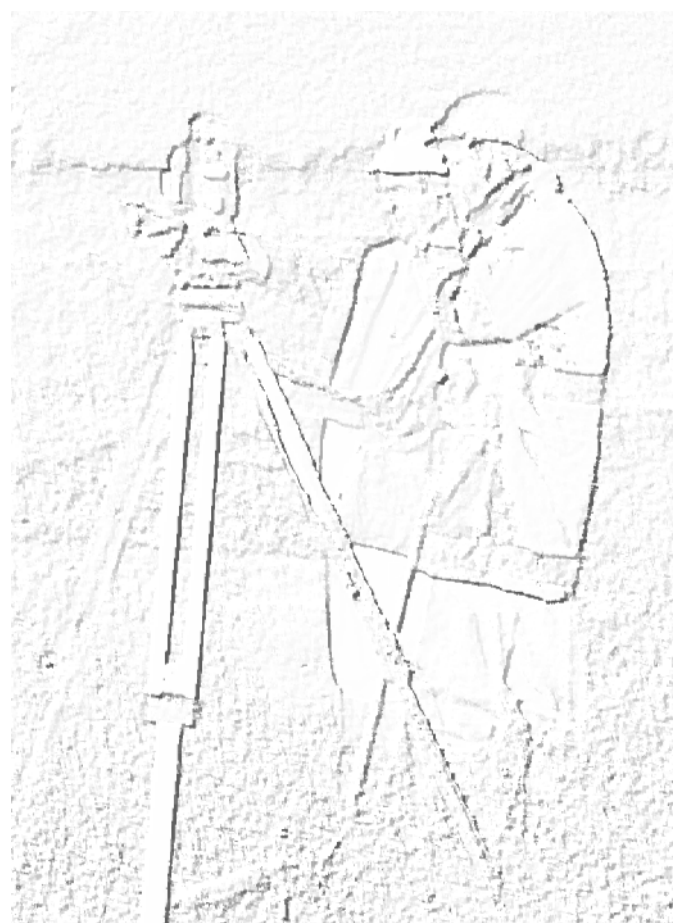

The key to successful land surveying is the collection and storage of accurate data. SV Surveying Ltd uses advanced computerised surveying systems to achieve this.

Using modern **Leica Electronic Total Station** and **GPS** surveying instruments, with electronic data loggers we input directly to the LSS survey and ground modeling software, from which we produce 3D Digital Terrain Models (DTM's). These can then be used to provide volume calculations, sections, plans and perspective views.

Our surveyors have many years experience using terrain modelling software. This benefits individual projects providing our clients with rapid, cost effective and accurate plans for both the survey and associated design work.

Our surveys are available in finished plan form or digital form via E-mail in either MOSS GENIO, **AutoCAD** v12 / v13 / v14 .DWG / .DXF and **LSS Model File**.

SV Surveying Ltd

Provides the following Surveying services:

- ✓ Green Field Topographic Surveys
- ✓ Quarry Face Updates
- ✓ Earthmoving / Volumetric Surveys
- ✓ Landfill Surveys
- ✓ Stock Surveys
- ✓ Royalty Surveys
- ✓ Void space / Reserve Surveys
- ✓ Mines and Quarries Tip Surveys
- ✓ Architectural Site Surveys
- ✓ Setting Out
- ✓ AutoCAD Drafting & Plotting

Topographic Site Survey
